TOUCHED BY HAND, SLOW FLOORING

Our Cotto flooring range represents a return to the simplicity of using clay. Raw, natural elements combine to form a genuine craft product. The style of flooring follows a rich heritage and authenticity that has been used in architecture for centuries.

These flooring tiles have a variety of colours, textures and sizes, which can all be used in classic or contemporary home and landscape design projects. Imperfections and subtle movements in colour result in a slow flooring aesthetic.

Bringing a sense of 'life' to any room, Cotto's earthy tones and rough edges also offer a stunning aged 'lived in' appearance that is incredibly soft underfoot and just gets better with age.
