A CURATED SELECTION

The addition of wood flooring products extends the Eco Outdoor® range of architectural surfaces to cater for a range of project needs beyond natural stone whilst also working incredibly well alongside it.

The curated selection consists of four colours in two finishes and one solid oak product in a Chevron format.

The products available in the distressed finish include Haybale, Mountain Ash, Smoke Stack and Willow and in the brushed finish include Lunar, Viking, Lady Gray and Summerhouse. Perla is a light grey variety in a Chevron finish.

Produced by a French supplier with extensive experience in the art of aged oak, the product display a beautifully aged patina that is achieved by utilising an age-old technique and avoids the use of synthetic colouring agents.

A classic combination of three widths and lengths is available and combined adds to the traditional appearance of the wood products.

Our approach to materiality has always encompassed the notion of natural beauty and beauty in imperfection and this new range of timber flooring embodies exactly that.
