## ORGANIC MOVEMENT THROUGH IRREGULAR SHAPES

Crazy Paving is an historical flooring method that has its origins in Ancient Rome. Today, the irregular shapes of the natural stone can be used to form a juxtaposition in a modern architectural setting.

The texture and natural colour and size variations make Crazy Paving ideal for courtyards, garden paving, pool surrounds, pathways and curved designs. The format allows for movement in a flooring aesthetic that is also a perfect means to visually break open a space

Our Crazy Paving stones are dense and thus incredibly durable; have natural variation in colour and have been processed to ensure a relatively consistent dimensional accuracy.

Beauford

Bluestone

Bolzano®

Brannon
