VERSATILITY OFFERS POTENTIAL FOR EVERY PROJECT

Bluestone has a strong tradition in both Australian and European architecture, and is used in residential and commercial projects alike. The character of the stone is evident throughout the raw material, with cat paws and natural imperfections

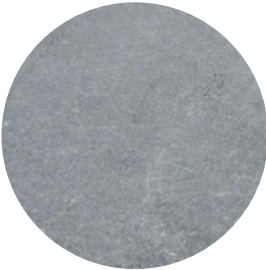

Our Bluestone offering is flexible and versatile, meaning we can collaborate with clients to achieve bespoke, one-off custom designs. The variety of textures that bluestone is available in allows for continuity from inside to out with a solution for almost any area while its neutral tones enable it to work well with any colour palette whilst still having a life of its own.

Bluestone is dense and durable, making it effective for high-traffic flooring settings such as driveways and pool surrounds.
